

# Component Maintenance Levels: An Overview

Delta TechOps provides component maintenance services that bring you maximum value with rapid turn times and expert-level knowledge. We offer three levels of service, each one uniquely tailored to fit a variety of needs for clients of every size.

		Level 1 Component Testing + Optimization	Level 2 Part Replacement	Level 3 Piece Part Repair
Testing Services	Delta TechOps offers testing for thousands of components with the most Automatic Test Equipment (ATE) in the industry.	✓	✓	✓
ISO 9000 Calibration	Our state-of-the-art calibration lab ensures every part is fine-tuned to meet rigorous standards.	✓	✓	✓
Precision Measurement Equipment & Tooling (PMET)	Unique to Delta TechOps, PMET uses industry-leading tools and metrics to take component optimization to the next level.	✓	✓	✓
Component Replacement	Delta TechOps will replace expired or damaged components, utilizing an extensive library of available parts.		✓	
Sub-component Repair ↳ Avionics	Delta TechOps repairs components at the individual piece level, enabling quicker turn times and delivering greater value.			✓
	We provide Level 3 repair for electronic and electromechanical components, including radios, flight instruments and more.			✓
