Repair Station Capabilities List (7D3R670D)

Page 1 of 5

Table of Contents

1   Introduction

This Capabilities List (CL) contains products and articles Delta Flight Product's Repair Station may perform maintenance, preventive maintenance, and/or alterations per 14 CFR 145. This CL, and any revisions, must be acceptable to the FAA **prior** to going into effect (See Sect 2 for approvals).

Distribution, revisions, and self-evaluations are described in detail in the Repair Station Quality Control Manual, 71PPM.

The Repair Station Manager will be responsible for maintaining the Capabilities List and will notify the CHDO of any changes or revisions. Notification may be in the form of telephone or email. As a courtesy, DFP's PMI will be notified prior to the change to the Capabilities List.
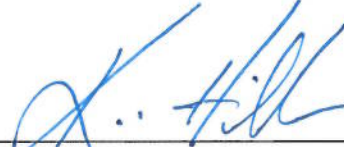

A self-evaluation will be conducted by the Repair Station Manager and documented on form 71-FRM-006 prior to any revisions of this Capabilities List. Any revisions to this Capabilities List will be noted with a revision bar in the left margin.
