

# LOWER DECK CREW REST

▲ DELTA

## Flight Products

Two assemblies - a main module joined with an extension - for ease in handling and installation at the front of the A330 aft cargo compartment.

Mates with an in-cabin crew access vestibule.

Two bunks and two seats for pilots. Six bunks for flight attendants.

All bunks and seats have dedicated PSUs with reading lights, USB and AC power outlets.

Controls for lighting, heating, and fire protection functions. Crew panel displays select cockpit and cabin data.

Two-way communication with the flight deck and select flight attendant stations.

Comfort features: foam mattresses, black out curtains, assist handles, and coat hooks.

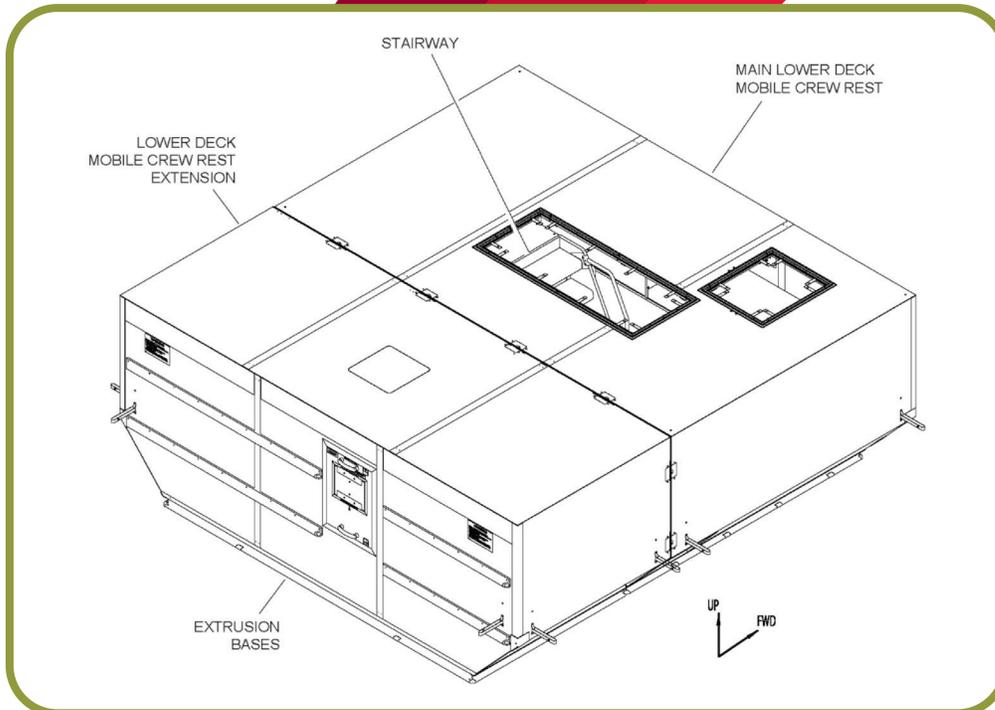

Delta Flight Products' Lower Deck Crew Rest offers a modular solution for installation in the Airbus A330 cargo hold. It meets all minimum FAA standards for crew comfort to support long-haul flight operations.
