Flight Products

Flexible design is compatible with various fan shafts.

Modular design allows for addition of new V-Block holders to accommodate various diameters.

Built-in suspension casters absorb shocks and vibrations, preventing damage when transporting on rough surfaces like loading areas near be.

The protective cover has two hard end caps to avoid damage to the ends of the engine fan shafts.

The tray includes tow hooks compatible with DAL Tech Ops transport vehicles, securing loads for safe transport outside MRO.

Optional real time tracking.

Delta Flight Products' Part Cart is designed to help prevent damage to valuable engine components. This helps prevent millions of dollars in engine equipment annually due to damages. This also helps in prevent delays in repair and maintenance work.

The inflator gun provided by the dunnage bag manufacturer allows for setting the exact PSI required to prevent over pressurization.

Single inflatable pocket that is designed to be quickly secured in place.

Two side sections that slope down to either side. Offering rain cover, should the transportation occur during inclement weather.

The tray can be stacked when not in use, and matches the existing tray storage configuration.

This tray can fit parallel or perpendicular to the loading bed of transportation vehicles. This greatly increases shipping capacity daily.

Tray dimensions:
108"L x 28"W x 28"H
